HYC JUNIOR SAILING

ESTABLISHED 1950

EDUCATION, TRAINING, PERFORMANCE

MAKE EVERLASTING *Friendships*

The HYC learning model promotes lifelong sailing in a variety of on-the-water disciplines, including both racing & non-racing to provide a skill development path for every sailor. The American Development Model promotes an athlete's advancement through a pathway supporting a healthy sport experience based on their physical, mental, and emotional level and potential for growth. By gaining experience and building confidence in a variety of watercraft, young sailors are better prepared to take advantage of new sailing opportunities in the future. The skills built at an early age lay the foundation for safe, fun, and successful sport that can last a lifetime.
